

Reading and Writing Across the Curriculum

Advanced Fluent Stage: Guided Reading Levels Q-S (40) & T-V (50)

Title	Text type	Curriculum links	Key concepts
Advanced Fluent Reading Stage: Level Q (40)			
What Makes a Champion?	Biographies	Health and Physical Education	Champion sportspeople have certain qualities that enable them to be the best. Some sportspeople face hurdles that they must overcome to become a champion.
Swim Like a Fish	Narrative	Health and Physical Education Language Arts: Literature	Characters can change, and these changes can be seen through their actions and dialogue. Sometimes a negative event can have a positive outcome for a character.
HeroRATs	Report	Science: Living things	Rats can be trained to help people. Rats can use their sense of smell to detect things such as landmines and tuberculosis.
Clever Ratty	Narrative	Language Arts: Literature	A character's attitudes and feelings can change throughout a story. Things that happen to a character can change how they think and act.
Advanced Fluent Reading Stage: Level R (40)			
First-time Visitors	Report	Social Studies: Geography	Some places are difficult and dangerous to visit. Some people risk their lives to be the first to visit remote, hard-to-reach places.
Odysseus and the Cyclops	Narrative	Language Arts: Literature	Legends are set in a historical time and place, with imaginary features such as mythical creatures. Legends convey a message or a lesson that people can learn from.
Polio: A Frightening Disease	Report	Health Science: Science at work	Some diseases cause fear and panic because they are contagious and can be deadly. Vaccinations protect people by providing immunity to diseases.
Dance On!	Narrative	Health and Physical Education Language Arts: Literature	Characters from different eras can be faced with similar challenges. The way in which a character responds to challenges reveals aspects of their personality.
Advanced Fluent Reading Stage: Level S (40)			
Our Active Earth	Report	Science: Earth Science Social Studies: Geography	The Earth is made up of several layers that are constantly moving and changing. The movement of the Earth can cause volcanoes, hot spots, earthquakes, and tsunamis, which can have devastating effects on people.
A New Geyser Erupts	Narrative	Social Studies: Geography Language Arts: Literature	Characters in a narrative sometimes reflect on previous experiences. A character's motives, attitudes, and actions can be influenced by their prior knowledge and experiences.
Clean Energy	Report	Science: Earth Science Technology	Energy is essential and can be produced in a variety of ways. Renewable energy sources never run out and they are a clean way to make energy.
Surviving the Earthquake	Narrative	Technology Language Arts: Literature	Narratives can be told from the perspective of different characters. Narratives can change setting (time and/or place) throughout a story.
